Dear Marc,

Thank you for your interest in AJL. To request access for non-commercial use, please fill out the attached agreement should you be able to meet the stipulations, and email it to [datasets@ajlunited.org](mailto:datasets@ajlunited.org)

If you are a student, please make sure your advisor also signs the document and that all collaborators sign the document as well.

As it is a common misconception, please keep in mind that PPB is not labeled for race as it is an unstable social construct that changes based on geography and national norms for ethnic enumerations. We also are aware we cannot assume a person's race solely based on an image of a face. Finally, as an attribute classification dataset, it is generally not well suited to 1:N tasks given there is only one image of each unique subject.

If any additional questions, please be in contact.

Many thanks,

Nicole
